- a. Description: PracticeGenius PlugIn
- b. Enabled: Checked
- c. Plug-in dll name: PracticeGeniusPlugIn[VersionMajMin].dll
- d. Select "MainToolbar" in the Button Settings
- e. Import the hub icon
- f. Click OK

4. Click "Setup" > "Data Path"

5. Open the directory (It is usually a server)

| 🔛 Ed | lit Paths | | ? | × | | | | |
|----------------|---|---|---|---|--|--|--|--|
| A to 2 | Z Images Folder for stori Store images and docume Store images in Dropbox (a Store images on a server v | ng images and documents nts on a local or network folder. an internet connection will be required) ria SSH File Transfer Protocol (SFTP) | | | | | | |
| Th C: is | This path is the same for every computer. If you have only one computer, then the folder can be local (like C:\OpenDentImages), otherwise it should be a folder shared on the network (like \\SERVER\OpenDentImages). A path is valid if it contains the A - Z folders. | | | | | | | |
| | C:\OpenDentImages\ Use multiple paths. Not recommended for most users. Separate different paths with a semicolon and no spaces. When starting the program, the first valid path that is found will be used. This can be used to run backups as long as you are careful. | | | | | | | |
| Pa | ath override for this compu | uter. Usually leave blank. | | | | | | |

6. Make sure if the "Plugins" folder exists. If not, create one under the path.

7. The dll needs to be in the folder "Plugins" and the dll name has to be "PracticeGeniusPlugin[VersionMajMin].dll

| Local Disk (C:) | > | OpenDentImages > Plugins | |
|-----------------|---|------------------------------|---------|
| ^ | | Name | Date m |
| | | PracticeGeniusPlugin24.1.dll | 8/6/202 |

If the practice uses OpenDental 24.1, the Plugin name has to be PracticeGeniusPlugin24.1.dll

**There is "PracticeGeniusPlugin.dll" in the repo.

When the practice installs the OpenDental with a new computer, set permissions for OpenDental folder under C:\Program Files (x86)

- 1. Right click on "OpenDental" folder
- 2. Click "Properties"
- 3. Click "Security" tab
- 4. Click "Users"
- 5. Click "Edit" button
- 6. Click "Users"
- 7. Click checkbox for "Full control"
 - Click "Apply" and "OK" buttons
